by Ahmed Fawzy Gad

SYNOPSIS

DOWNLOAD Start building Python-based Android applications using Kivy with Android Studio. Through in-depth examples, this book teaches you everything you need to create and publish your first Android application in Python. Building Android Apps in Python Using Kivy with Android Studio takes you through the basics of Kivy by discussing its application structure, widgets, and event handling. The KV language is then introduced for separating the logic and GUI by adding widgets within a KV file. You will then learn how to utilize Android camera using Kivy, build the HTTP server using Flask, and create and manage multiple screens to help you design your own applications. Through detailed step-by-step instructions, you will create your first multi-level cross-platform game that includes animation and sound effects. Following this, the process of converting the Kivy application into an Android application using Buildozer and Python-4-Android is covered in detail. You will then learn how to edit the *Building Android Apps in Python Using Kivy with Android Studio: With Pyjnius, Plyer, and Buildozer for Publishing Apps in Google Play* **popular book online top (hyyjui0986u7676)**
